PROFILE SUMMARY

Data-driven and analytical student with proficiency in Power BI, Python, SQL Databases and Mathematics. Experienced in the end-to-end data lifecycle, from cleaning and querying large datasets to developing interactive dashboards that reveal key business insights. Good at solving complex problems and support data-informed decision-making, makes me a strong candidate for Data Analyst and Power BI Developer roles.

TECHNICAL SKILLS

Languages: Java, Python, SQL, c, HTML/CSS

Libraries: pandas, NumPy, Plotly, Matplotlib, Streamlit

Data Visualization: Power BI, Excel

Data Base and Cloud Platform: MySQL, MS SQL, Postgresql, GCP

Other Tools: Git, Github, Jupyter Notebook, Pycharm

PROJECTS

Olist E-Commerce Analytics Dashboard | *Ms SQL, Power BI, Python, Jupyter notebook*

[Github](#) | [Live](#)

- Developed full-stack analytics solution Python, SQL Server, and Power BI.
- creating four interactive Analytical views Pages to solve the real world Business Problem.
- Engineered automated ETL pipeline with pyodbc connecting MS SQL Server to Jupyter Notebooks 100k+ Transactions for data extraction, cleaning, and transformation using Pandas.
- Engineered a Star Schema in Power bi and Perform Feature Engineering, Complex Dax calculations and Designing.
- Upload the report on Microsoft Fabric to share the report securely with stakeholders.

Financial Dashboard | *Power BI, Power Automate, Python, GCP API*

[Github](#) | [Live](#)

- Engineered an automated ETL pipeline using Power Automate and Outlook to segregate emails and sync data attachments to Google Drive.
- Integrated GCP APIs with Python scripts to authenticate and fetch raw files, bridging the gap between cloud storage and the reporting environment.
- Utilized Power Query to perform complex data transformations and cleansing, standardizing raw field data into a unified schema for analysis.
- developed a comprehensive dashboard analyzing Portfolio Health, Risk, and Demographics, enabling data-driven decisions on credit distribution and capital exposure.

Olympic Web Application Dashboard | *MySQL, Python, Jupyter Notebook, Streamlit*

[Github](#) | [Live](#)

- Developed and deployed a multi-page interactive web application on Streamlit Cloud, ensuring global accessibility and seamless user performance.
- Extracted raw historical data from Database and performed extensive data cleaning and preprocessing in Jupyter Notebooks to ensure accuracy.
- Designed advanced visualizations using Plotly to build interactive, multi-layered and Interactive charts.
- Optimized data processing speed using Pandas vectorization to handle large dataset, ensuring real-time dashboard responsiveness.
